

## Single Hot Shower Stall

Self-contained portable shower offering home-like comfort in an easily transportable unit.

The Single Hot Shower Stall features a removable hand-held shower nozzle, with separate hot and cold water valves. The interior of the unit sports a shelf for personal items, and a spray. Coat hooks mounted to the door and to each of the right and left walls just inside the door are protected from water by a full-length. The unit rests on a water containment skid, with threaded fittings in each runner that allows gray water to be piped away to a holding tank or bladder.

This is not a room temperature shower: water is heated to an average temperature of 115 degrees by a electric or fueled on-demand , and may be adjusted to suit the user's comfort level. A 20-pound propane tank (not included) powers the heater for up to 18 hours of use at a flow rate of 1.4 gallons per minute. The only outside connection necessary is a garden hose with a minimum of 20 psi water pressure.

### Features & Specifications

- \* Large roomy interior
- \* Removable hand-held shower nozzle
- \* Spray soap dispenser
- \* Coat hooks
- \* Vanity shelf
- \* On-demand electric or fueled hot water system
- \* Separate hot / cold water controls
- \* Containment skid collects gray water through half-grated floor
