

JTG Hi-Rise Unit

The Hi-Rise Unit is a completely self-contained and highly portable unit that goes where the work is. Designed specifically for high rise construction, the unit rolls into construction elevators with its tough steel castors or is easily lifted by a crane by a sturdy sling. The tough exterior provides privacy and stands up to the rigors of construction. This facility saves time and money by placing the toilet in close proximity to the workforce.

Features & Specifications

- ▶ Designed exclusively for high rise construction projects
- ▶ Equipped with a sturdy sling for lifting with a crane
- ▶ Strong steel frame and tough polyethylene construction
- ▶ Tough steel locking casters
