

# JTG Water-Filled Barriers

Our water-filled plastic barriers are Longitudinal Channelizing Devices (LCDs) designed in a safe and effective manner. These stackable and easily transportable units are perfect to control vehicular and pedestrian traffic in work zones, temporary roads or construction sites.

The simple-to-use interlocking system uses a coupler to connect the units and offers seamless safety and control. With easy fill and drain capability, these barriers go from lightweight and transportable to dependable and heavy-duty. With easy forklift access incorporated in the design, these barriers are a favorite for traffic control and more.

Length: 6'  
Width: 18"  
Height: 32"

## Features

- ▶ Forklift access incorporated in the design
- ▶ Made of high-density polyethylene
- ▶ Easily stackable and transportable
- ▶ Multiple uses: longitudinal barrier, fencing, road closures, lane closures and to indicate work zones.
